

Hot Foil Printing Colours

We offer two methods of printing: Hot Foil Printing and Debossing. The Metallic/Gloss colours reflect light, unlike the Matt Colours which remain their true colour in most light conditions.

Please note that this only a digital example of the foil colours we offer and do not represent the final print colours. We highly recommend ordering a printed sample box to see the colours true to life.

Also note that Debossed is a stamped look into the box and does not add any pigment with the box colour unchanged.

*Matt Red is not available on black boxes.
